génia NEW ZEALAND

Génia

Since Génia's inception in 1945, the innovation driving our growth has made us a market leader, providing specialised solutions to veterinarians worldwide.

Génia is a family-owned company headquartered in St. Hilaire de Chaléons, France with over seventy years in the veterinary supply industry.

Our spearhead product was the cutting-edge Plexiglass syringe, Géniaplex. Today, we manufacture over 2,500 premium SKUs under nine product ranges in over seventy countries.

Our branches in France, Australia, Hong Kong and USA help us acquire top insight into the global veterinary market.

Our consistent goal is to provide veterinary professionals with quality products that elevate their practices, with an emphasis on improving the comfort and hygiene of the animal.

From this year, we are happy to start visiting veterinary clinics thanks to our brand ambassador based in Auckland.

Promoting our products in clinics – daily – enable us to maintain a close contact with animal health professionals.

Génia veterinary products are available in New Zealand through Shoof International, our local partner.

SMALL ANIMALS

Our range of Elizabethan Collars has been carefully thought out to fit all vet practices needs, thanks to the following features:

Our well-known **quick fastening system**: Release the E-Collar by bending the inside part completely back, until it marks white.

Scalloped edge: The wavy outer edge makes them sturdier and less sharp on your legs.

Smart hanging system: The open storage hole allows you to store each E-Collar on the same hanger; pull off just the one you need. Save space and time!

Colour coded according to the size: For better recognition, it makes your life easier.

3 to 5 neck adjustments: To get the perfect snug fit for any animals.

ALL our E-Collars are 100% recyclable.

FUNCOL®

Shannon, Vet Nurse

Genia E-collars are perfect, easy to put together compared to others brands.

Briar, Practice Manager

We did get the 17.5cm e-collars in, and they have been working a treat.

Samantha, Practice Manager

We switched to Funcol E-collars because we like the paw prints pattern, we found them nicer than plain ones. We never had any issue with them so far!

TESTIMONIALS

GREENCOL

Bruce, Vet Nurse

The Greencol E-collars are fantastic. They are pretty easy to put together and are durable.

Shanna, Vet Nurse

The Greencol E-collars are cheaper than Buster. We also like the fact we can hang them on the same hook, and pull the one we need without taking off the others ones, thanks to the opened hole.

Mikaela, Practice Manager

We like the Greencol E-collars because they are easy to put together and release. It's ideal when you need to resize them on the patient.

Karinda, Vet Nurse

We find the Greencol E-collars more comfortable than everything, they are softer on the neck. They are easy to put too.

TESTIMONIALS

VELFAST

Kathryn, Vet Nurse

The Velfast E-collars are really convenient. They get on and off quite easily. I also like the soft edge on the neckline. The Velcro is strong, making the E-collar re-usable, compared to a clickable E-collar, less sturdy. They look nice too.

Jess, Vet Nurse

The Velfast E-collars are easy to put on. They're ideal for patients with small neck, as we can easily adjust them; not too loose or too tight. They're comfortable for the animals. Nice and easy.

Sophie, Vet Nurse

Just got some more, we absolutely love these e collars. They are so easy to use and even clients comment on the look and durability they have! Thanks so much for recommending them to us.

Dr Caroline, Vet

I have done some initial trials, in a home setting, to help my little old miniature pinscher, Roo, get used to the Velfast E-Collar, and I was very impressed how quickly he came to accept it! Like most dogs, he has not been a fan of E-Collars. It's amazing what taking your

Christine, Head Vet Nurse

We love the VELFAST, especially on angry kitty cat, and our customer do too.

Tracey, Vet Ophthalmic Nurse

Dogs tolerate more the Velfast E-collars than any others e-collars, as they are more comfortable. Owners are surprised by this product, and grateful because their pets are less stressed.

TESTIMONIALS

NEOCOL®

Kea, Practice Manager

I like Neocol E-collars because of their soft edges and the fact they are reflective. They are also easy to pull apart when they are in the wrong side.

Christie, Vet Nurse

All the staff love the Neocol E-collars! We like the soft padded edge and find these e-collars more flexible and comfortable than others brands.

Rachel, Vet Nurse

We love the Neocol E-collars, they are easy to click! The soft edge protects the patient from scratching himself.

Amy, Vet Nurse

We like the Neocol E-collars because they are user-friendly; they're a nicer for your legs when pets run into you.

Elissa, Vet Nurse

We use the Neocol mostly for smaller animals (such as puppies or kittens) or for scared patients, as it is more comfortable for them.

SOFT SPLINT ROLL

These splints can be moulded to the shape you need.

Lightweight, compact and very comfortable for the animal: can help to avoid pressure sores.

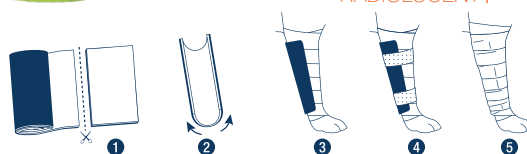

- Reusable: easily re-shapeable for another application.
- Washable: closed-cell foam allows easy cleaning or disinfection (material compatible with most cleaning products).
- Easy to cut.
- Radiolucent.
- Soft but resilient: very efficient for immobilization.
- Ideal for any small animals as well as foals and goats.
- 3 sizes, colour coded.

Singly wrapped. Sold individually.

Génia	Shoof	Size
3078301	222372	4,5 x 25 cm

3078341	222374	9 x 40 cm

SHAPEABLE & RADIOLUCENT

SOFT SPLINT ROLL

Amy, Vet Nurse

We used the soft splint rolls mainly on small dogs, such as pugs; it went really well! We can cut the splints into the length required, which is very convenient.

Katherine, Vet Nurse

We do lot of orthopaedics and we found that that cat tolerate the soft splint a lot better.

Dr Rob, Vet

They are excellent for particular cases, especially for small dogs or cats. They're light and work really well.

Jacqueline, Practice Manager

I like the fact we can cut the soft splint rolls to shape and mold them.

TESTIMONIALS

BITTER TASTE BANDAGES

Monique, Head Vet Nurse

Bitter taste bandage gives us an extra security and more comfortable. It ensures the patient doesn't lick it and secures the catheter and the fluid.

Janelle, Practice Manager

Genia bitter taste bandage is the best bitter one we've tried; it's successful. We use it over the catheter.

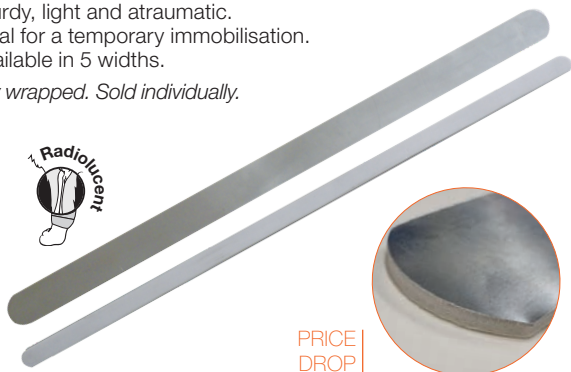

TESTIMONIALS

FLAT SPLINTS

Splints with an aluminium side and a protective soft foam side. Ideal for tails.

- Can be cut.
- Radiotransparent.
- Sturdy, light and atraumatic.
- Ideal for a temporary immobilisation.
- Available in 5 widths.

Singly wrapped. Sold individually.

TESTIMONIALS

DRYSOFT

Greta, Practice Manager

Genia puppy pads are really good, we never had any leak with, as they are highly absorbent. We like the fact they come in pack of 25.

Brie, Practice Manager

The Drysoft are very absorbent; good quality.

DIGIFLASH

Jennine, Vet Nurse

The Digiflash thermometers are quick and we like the flexible tip. It's also water proof, I left it in the washing machine and it kept working!

Kellie, Vet Nurse

We find the Digiflash way easier to use thanks to its flexible tip. It's also more comfortable for the patient.

Rhianna, Vet Nurse

The Digiflash thermometers are great because they're really soft and take the temperature straight away, compared to other ones.

TESTIMONIALS

DRYSOFT®

Economical and highly absorbent under pads.

Made of a SAP polymer gel layer (Sodium polyacrylate), covered with a cellulose thin layer resting on an impermeable non woven layer.

Liquids leak prevention.

- 5 layers: absorbing 200 to 300 times its mass in water.
- Neutralize the odours.
- Antimicrobial protection.
- Ideal for dentals, cages, surgery tables and puppy schools.

Sold in packs of 25 or 30 under pads.

HOSPITALISATION

COSYPAD®

Non-absorbent meshed mat providing comfort and hygiene; it has become a clinic favourite!

The COSYPAD® is non-absorbent, it allows liquids to pass through the mat, leaving the animal dry. Perfect to use in your cages for incontinent patients or when waking up from GA's. It minimizes pressure on muscles, joints, and prevents bedsores, making it ideal for hospitalised patients.

Thanks to its anti-slip layer, the COSYPAD® is ideal to use on your consult or surgery tables. The meshed material provides an optimal comfort and ventilation, as well as a thermal barrier to cold tables.

The small COSYPAD® makes a great dental mat: place the head of the animal on top of the mat while descaling, and let liquids drain through.

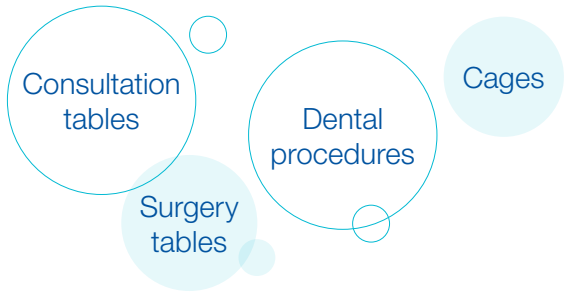

Tired ? Use your COSYPAD® as an anti-fatigue mat !

Last but not least...

Easy to clean: COSYPAD® is machine washable (up to 40°C) and dries quickly even in winter.

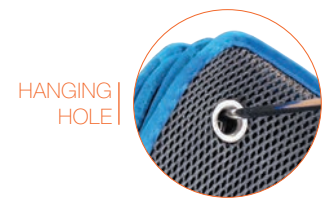

Chew & stain resistant: COSYPAD® is meant to last years !

IDEAL FOR YOUR:

Génia	Shoof	Size	Use

ROUNDED | CORNERS |

DENISTONE VETERINARY SURGERY - Tong Tong - COSYPAD®

Perfect to protect from the cold of consultation tables

Ideal for dental surgeries

Anthony, Vet

"As a veterinary nurse for 12 years before a practicing vet, I can thoroughly appreciate the sheer amount of cleaning, washing and disinfecting required in day to day operations of a hospital. We want out patients to be comfortable and warm and are always looking to improve hospital care and efficiencies when dealing with bodily excrements.

When Génia introduced their new COSYPAD® we trialed them, and within weeks filled every cage in 2 24hr hospitals with them as routine. Now every patient has a comfortable non slip bed which keeps them off cold surfaces and prevents urine scalding. Being hygienically washable means we have drastically reduced our use of towels and the costs of washing as a consequence. We have also found them particularly useful as a non-slip surface in consult and prep benches, and routinely use them as the resting surface for patient heads during dental procedures, with pee pads underneath keeping their face far cleaner. Very useful in the car too ! We absolutely love them! :)"

TESTIMONIALS

Sally, Practice Manager

We use our Cosypads everyday, either for dentals or on our surgery table. They're really good, we're happy with them!

Michelle, Head Vet Nurse

We use the small Cosypad mostly for our dental procedures. As the liquids go through, it keeps the cat dry. We like to use it as well on our consultation tables, during vaccinations or when taking blood samples. The mat doesn't move thanks to its anti-slip layer.

Emma, Head Vet Nurse

I'm really liking the cosypads for our dental procedures. They provide much more comfort for our patients than what we were previously using.

Linda, Practice Manager

We like that the Cosypad is machine washable. The soft padding makes it ideal for orthopaedic recoveries.

Louise, Vet

The Cosypad padding is really good as it avoids pressure sores. We use the mat also for our dental procedures.

Trevor, Vet

We value the Genia Cosypad for its efficiency in keep our patients on a dry comfortable surface but also for its hardwearing quality and ease of cleaning. Would recommend as a good investment.

Sarah, Vet Nurse

We use our Cosypad for all our dentals. As the liquids go through, the patient doesn't sit in a cold wet surface. And it's easy to wash! We like as well its non-slip layers.

Kelly, Vet Nurse

We use the Cosypad in our cages. As the liquids go through, the patients don't stay in their own wee. We use it as well on our examination table because it has anti-slip layers.

Lauren, Vet

We are currently using the Cosypad for a dog with snake bite paralysis, and they are going really well.

April, Practice Manager

The Cosypads are great, we have been using them for dentals, also older dogs and longer staying patients in hospital.

TESTIMONIALS

DENISTONE VETERINARY SURGERY - Bella and Dougal - COSYPAD®

VACUUMAT®

VACUUMAT® - Our lightweight positioning mat that holds patients in the desired position prior to a surgical procedure, ultrasound, MRI, CT or X-ray (as it is radiolucent). The insulation and shaping properties are made by microbeads from a sturdy polyurethane material.

You can easily clean it with soapy water or simply wipe it down.

The material is thick and resistant to damage.

It comes as a complete kit, including the mat and an adapted vacuum pump.

⚙️ How does it work ?

1. Lay the animal on the mat, in the desired position.
2. Close the valve.
3. Suck the air out of the mat with the adapted pump in less than 10 seconds.

Et voilà!

💖 Why do you love it?

- The mat conforms to the body shape and holds the patient in place. The animal won't move or slide away.
- It is ideal for X-rays positioning, especially for hips and legs, that often require difficult angles.
- As it provides stable immobilisation, the VACUUMAT® is also perfect for eye surgeries.
- The mat gets stiff while remaining flexible and very comfortable for the animal. The stiffness can be adjusted by slowly releasing the valve.

📏 What else?

- The VACUUMAT® reduces hypothermia as it keeps patients off cold surfaces, and it is highly insulating. The microbeads hold and maintain patients' body heat, while preventing from a drop in temperature.

THERMAL

Claire, Practice Manager

I love the Vacuumat to position the patient on the surgery table. I use it every day.

Sarah, Vet Nurse

The Vacuumat is quite good. We use it mostly for X-rays procedures and for tall animals as it holds their position.

Dr Sam, Vet

We find the Vacuumat convenient to mold around the patient body. We use it mostly to stabilise the animal on his back during surgery.

Belinda, Practice Owner

We use the Vacuumat to assist in comfortable positioning for patients during ultrasounds and radiography procedures.

Emily, Practice Manager

We love the vacuumat, even with a little bit of blood it comes off very easily. The pump works fine. It's also such a quick-release that you can shape it to your needs. It really molds around the patients limbs and you can adjust the firmness. We love it for dentals, X-rays, surgeries, we basically use them all the time!

Kay, Vet

We use the Vacuumat for eye surgeries, as it maintains the patient on the correct orientation all along the operation.

Kelly, Vet Nurse

The Vacuumat is easier than sand bags. It's ideal to use for the vets, to position the patient.

Michelle, Vet Nurse

The Vacuumat is soft for the animals and keeps them in the position that we want.

Trevor, Vet

The Genia Vacuumat is so helpful and versatile for patient cushioning, insulation and positioning. We have been using them every day for surgery and radiographs for a couple of years now. It is easy to clean and showing no sign of wear. I can confidently recommend them.

TESTIMONIALS

Samantha, Practice Owner

One challenge we face that I think we can all agree on keeping patients in position during procedures, especially the deep chested dogs! I've been looking into the best options for this, as towels, tie downs and foam pads just weren't cutting it anymore, but I've since come across the Vacuumat from Genia Australia that might be a one size fits all.

The mat is insulated to maintain body heat and inflates in less than 10 seconds, around your patient in their desired body position. No more rolling and folding of towels and repositioning half way through surgery when they slip.

Raj, Vet

We love the the Vacuumat, we have one small and one large that we use mostly for our desexing procedures.

Alice, Head Vet Nurse

We use our Small and Large Vacuumat everyday for all our surgeries. On top of positioning the patient, they transfer the heat, maintaining his body warmth. We grab them for X-rays as well. We simply love them!

Steph, Vet Nurse

We find the vacuumat helpful during surgery in keeping animals positioned, especially for any midline surgical procedures.

Hayley, Head Vet Nurse

The Vacuumat makes the animal more comfortable. It's way better to position him. It's simply awesome! We use it for both surgery and X-rays.

Vivian, Vet Nurse

The Vacuumat is a big help, especially for deep chested dogs such as greyhounds! We mostly use it for our CT scans.

Monique, Head Vet Nurse

We have the Vacuumat in 2 sizes; it's much better than using sand bags!

Dawn, Practice Manager

We like how the Vacuumat is easy to use and to store. It's a reliable product.

Merinda, Practice Coordinator

The Vacuumat is quite handy; we use it mostly for our X-rays as we don't need to be in the room anymore to hold the patient. We use it as well for few surgeries, especially on rabbits.

TESTIMONIALS

BLUE PET PILLER

Pill popper with a soft atraumatic rubber tip end. Can be used with water to wash down the tablet.

- Flexy soft tip with good grip.
- Can be used with one hand.
- Add water into the syringe to facilitate the swallowing of the tablet.

Sold individually or in boxes of 12 pet pillers.

Génia	Shoof	Description
227230	222145	Pill popper

3 EASY STEPS:

1. Draw water into the pet piller
2. Add the pill into the rubber tip
3. Flush the tablet down the animal throat

PET PILLER

Kay, Practice Manager

We like the size of the Pet Piller. We find it easy to use.

Jacqui, Practice Manager

It's easy to use, I mix it with water.

Rebecca, Practice Manager

It's convenient to use it with water. Really easy to use.

Sam, Practice Manager

Genia Pet Piller is quite good! We like the fact we can use it with water; it encourages the patient to swallow, instead of spitting out the tablet.

Samara, Practice Manager

We like the fact Genia Pet Piller are smaller than regular ones, making it easier to use.

Tracy, Vet

The pet piller is really user-friendly. Pet owners find it easy to use, and don't come back complaining about it. Thanks to the water feature, it helps the automatic swallow reflex, which makes it less stressful for the patient.

ORTHOPEDICS

PROTECTION

SURGITEK

Sterile latex surgical gloves, lightly powdered.

Ideal thickness for strong but sensitive gloves with excellent stretchability to add extra comfort and durability. Smooth and microtextured on the palm to optimize the grip on instruments.

- High quality natural latex with low protein content to limit allergenicity.
- Ultra sensitive for an optimal touch.
- Micro-textured surface for a better grip.
- Anatomically-designed fingers and thumb on the inside.
- Rolled edges and lightly powdered for easier removal.

Sold in boxes of 50 pairs. Individually sterilised and wrapped.

TESTIMONIAL

PERFUVET PLUG

Stacey, Practice Manager

The vets are happy with the size & length of the Perfuvet Plug and like the extra ports.

PERFUVET MICRO

Simon, Vet

I like the Perfuvet Micro giving set because we don't have any IV pump. It is lovely to have some degree of metered control of the flow rate. We do make sure to hang the I/V bag as high as possible to maximise the accuracy. Works well in small to medium dogs and cats.

Brooke, Practice Manager

The Perfuvet Micro is convenient; we use it for our anesthetic and hospitalised patients.

PERFUVET® TWIST

Let's take away some of your day-to-day worries with our new PERFUVET® TWIST.

This new device prevents patients from getting tangled up in the tubing.

Composed of a reusable rotating base placed on the cage ceiling and a spiral extension set, this is the best combination for patients to move freely and prevent fluid flow obstruction.

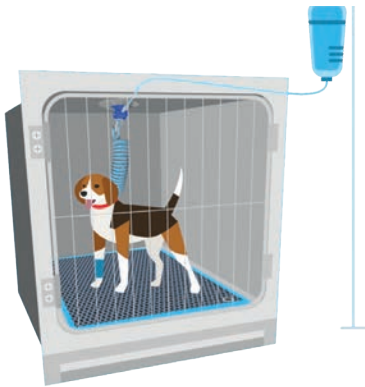

Why do you love it?

- When patients walk in circles in the cage the spiral tubing will follow their movements, thanks to the rotating base.
- Tubing will not tangle around the animal and will be less inclined to kink thanks to its spiral shape.
- It is ideal for hospitalized patients, overnight IV therapy, and patients with neurological disorders.
- It will improve safety and save time.

Ready to use kit includes:

- One grey base with an adhesive backing for permanent attachment to the top of the cage.
- Two blue shells connecting the extension set to the base.
- Three sterile 3 meters spiral extension sets with collar ring.

Sold as a kit including one base, two blue shells and three sterile spiral extension sets.

Génia	Shoof	Description
157450	225444	Perfuvet® Twist kit (1 base, 2 blue shells and 3 spiral tubings)
157451	225445	3 spiral tubings
157452	225446	Set of 2 blue shells

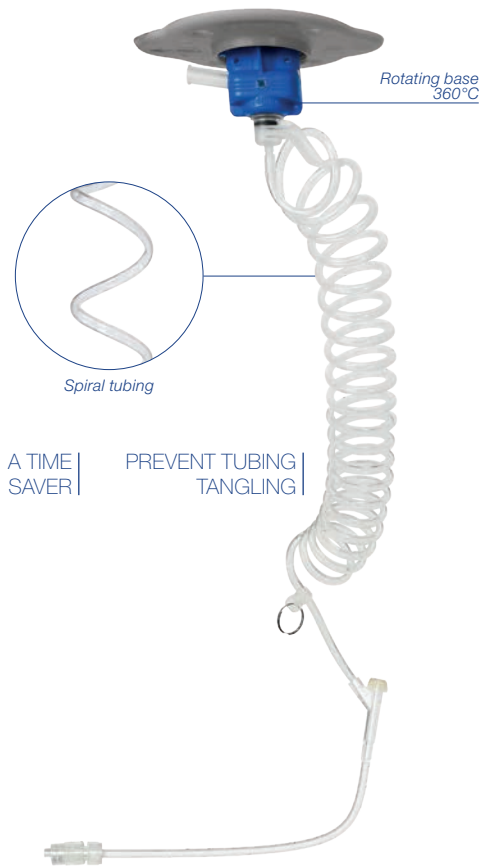

IDEAL FOR YOUR:

Hospitalised patients

Anxious patients

Overnight IV therapy

Neurological disorders

A TIME SAVER | PREVENT TUBING TANGLING

PERFUVET TWIST

Jane, Vet Nurse

The Perfuvet Twist is brilliant! We used it with a hospitalised dog who didn't get tangled in the cage.

Dylan, Head Vet Nurse

We have definitely been using the Perfuvet twist. They are a great product, each time we use them they are easy to install and the animals are about to move around the cage freely.

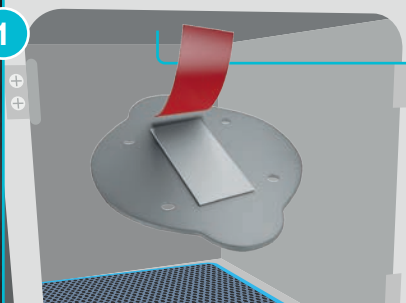

Sharon, Practice Manager

We use the Perfuvet Twist for our hospitalised patients. We find it much easier than regular admin sets, as it's not getting tangled around the patient's legs.

TESTIMONIALS

1

Stick the grey base permanently on the ceiling of the cage, thanks to its strong adhesive.

2

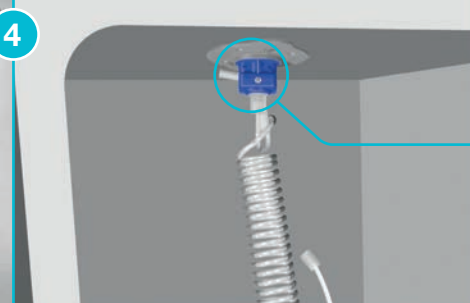

Insert the spiral extension set into the first blue shell.

3

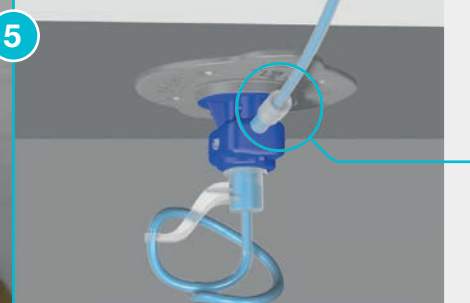

Assemble the second blue shell into the first one. The spiral extension set is now locked into the shells.

4

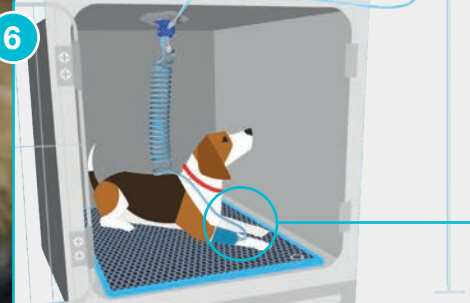

Twist the blue shells in the grey base.

5

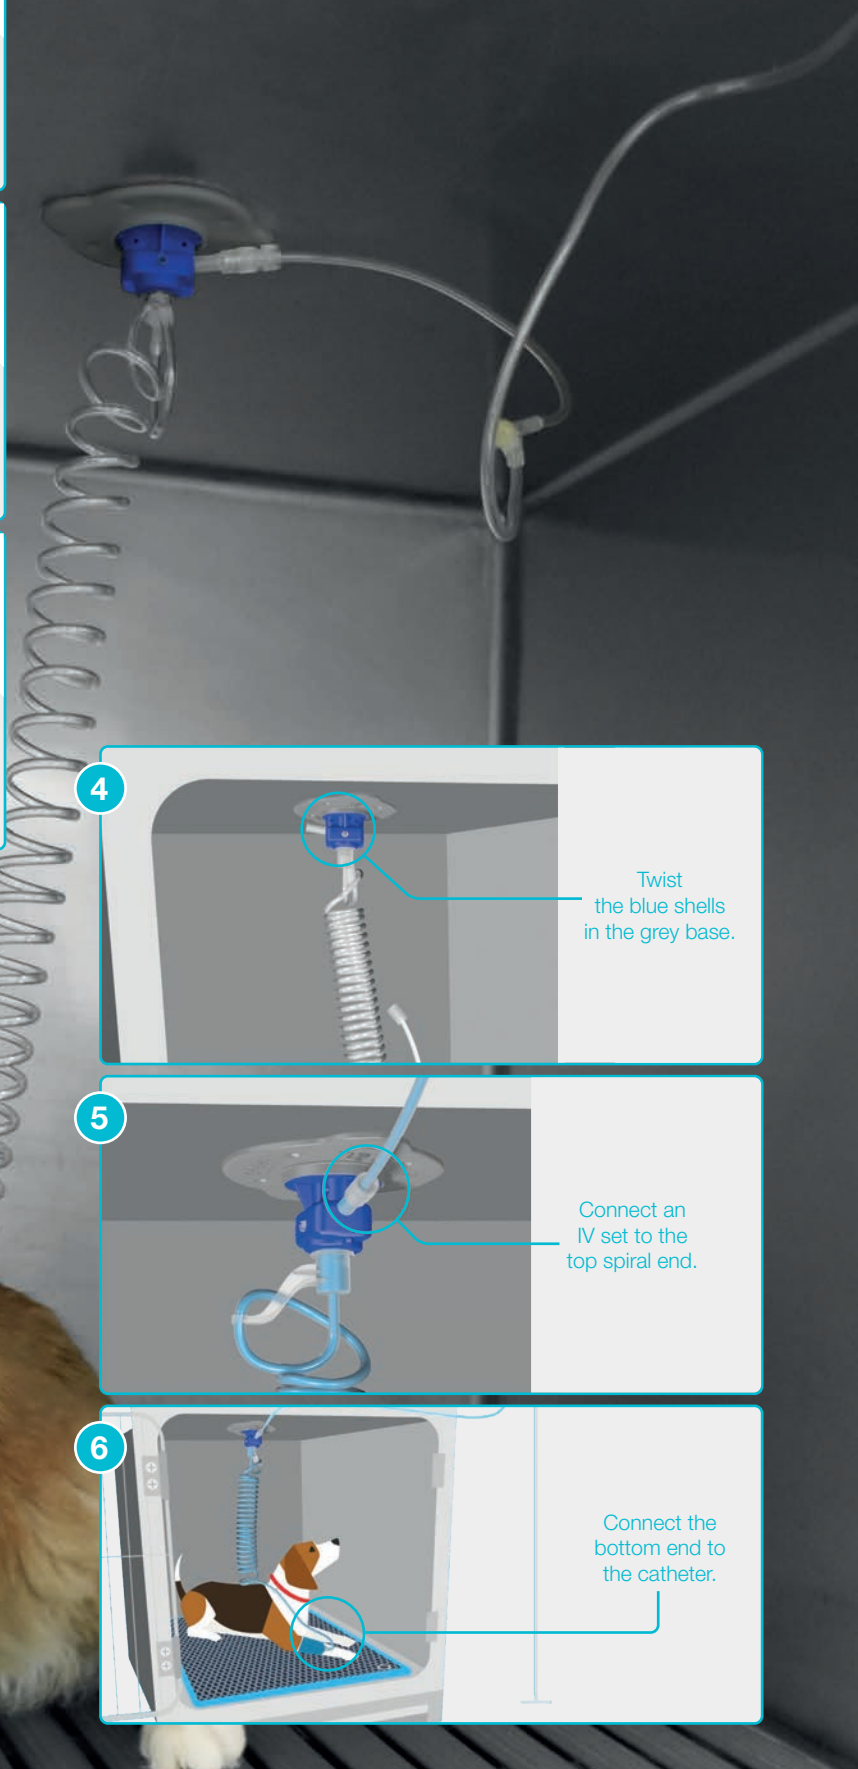

Connect an IV set to the top spiral end.

6

Connect the bottom end to the catheter.

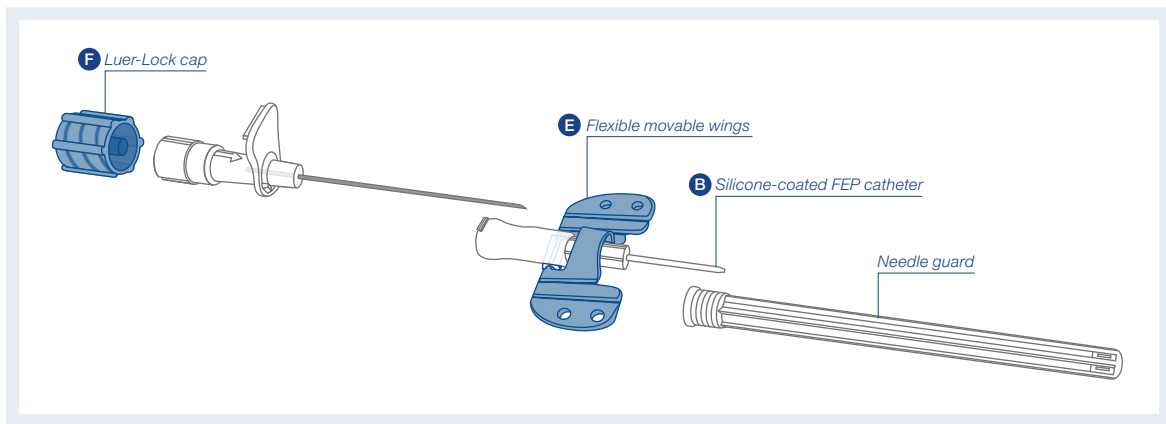

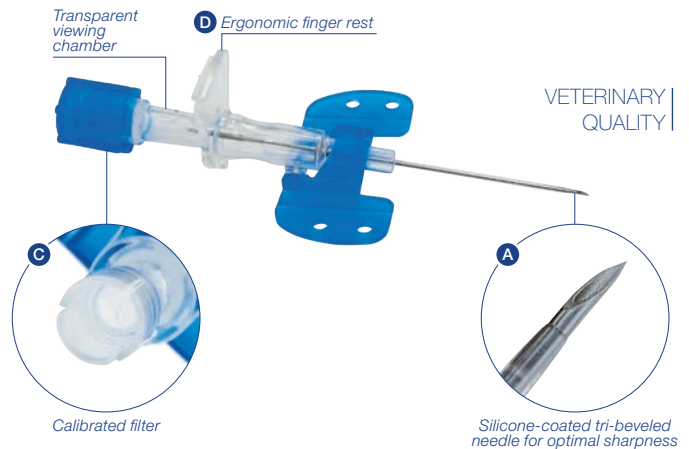

ANIVEN®

FEP intravenous catheter featuring flexible wings for easy placement. Ultra-sharp tri-beveled needle.

- Long triple-bevel designed to minimise patient discomfort and tissue trauma **A**.
- A silicone layer coating the needle and catheter results in a smooth transition from needle to catheter during insertion.
- Silicone-coated Teflon Fluoroethylene Propylene (FEP) catheter to prevent kinking during catheter insertion **B**.
- Transparent viewing chamber for immediate visualisation of blood reflux.
- Porous membrane allows a quick blood rise into the viewing chamber **C**.
- Ergonomic 'finger rest' for a smooth and controlled placement **D**.
- Movable and flexible wings with two grooves to comfortably fit animal's limb **E**.
- Catheter can be stitched in place, thanks to its wing holes.
- Luer-Lock cap with the catheter colour code **F**.

Sold in boxes of 12 catheters. Singly sterilised and wrapped.

aniven
veterinary excellence

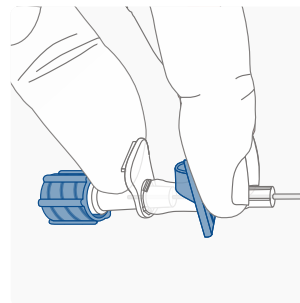

TESTIMONIALS

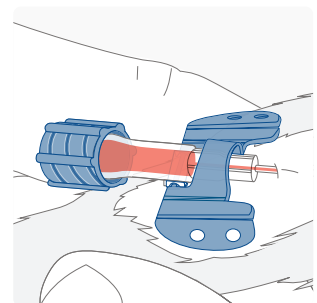

ANIVEN

Samantha, Owner

I tried out a new style of IV catheter called Aniven from Genia Australia. I think these will be great for those patients who roll around in their cage and pull their catheter out, the wings will be much easier to tape in that other types of catheters.

MOVABLE WINGS

MADE FOR VETS

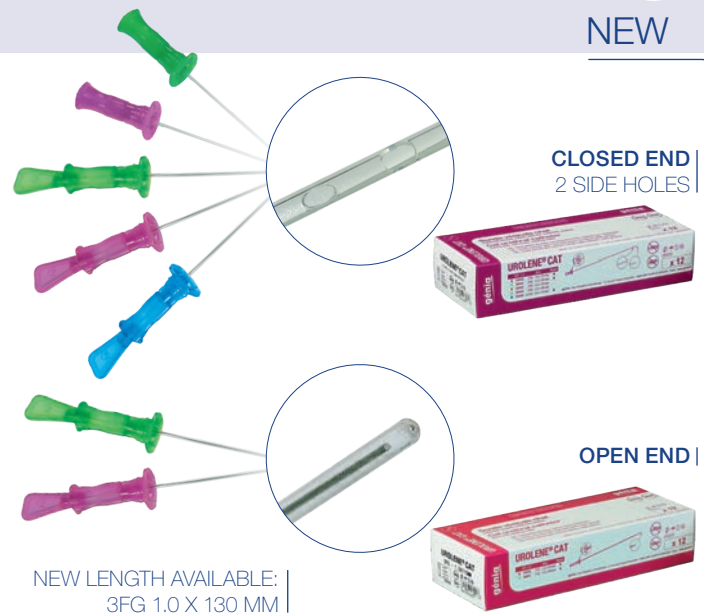

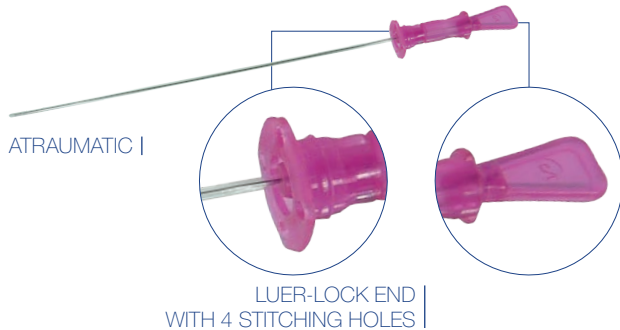

NEW

UROLENE® CAT

High quality sterile urinary cat catheter featuring a rotating luer-lock end, providing better comfort for the patient.

- **360° rotating collar - with four stitching holes.** Offers more comfort on patient's prepuce, as it follows the cat's movement.
- **For a perfect fit, choose between:**
 - **Closed rounded end with two side holes:** atraumatic, and easier to insert into the urethra.
 - **Open end:** ideal to unblock a cat with urethral obstruction.
- **Luer-Lock hub:** easier for urine collection.
- Made of medical grade elastomer of Polyether Block Amide providing a great compromise between rigidity and flexibility. Non-reactive material, ideal to leave in, up to three days.
- **DEHP-free & radiotransparent.**
- Available in **3 sizes: open or closed end and colour coded (blue: 2.5FG, pink: 3FG, green: 4 FG), with or without stylet.**

Sold individually or in boxes of 12 catheters. Singly sterilised and wrapped.

URINARY CATHETER

Amanda, Head Vet Nurse

Urolene catheters are so nice and smooth, compared to others. The material makes them easy to insert into patients.

Richard, Vet

We've been using Genia urinary catheters for years. They don't spin too much around at the junction and come in several sizes.

Tara, Head Vet Nurse

Genia urinary catheters are easy to work with; the vets like them.

Venessa, Practice Manager

Genia urinary catheters are so easy to use! They go through really well. They have as well a wide size reference, to fit them all!

Cat catheters: We like the fact we can easily stitch the base in.

Dog catheters: They are durable. They're nice and sturdy, without being too stiff.

Libbie, Practice Manager

We like the fact we can stitch the urinary catheters. They are really comfortable for the patients.

Mano Médical

by **génia** GROUP

YOUR INNOVATING PARTNER IN MEDICAL DEVICES

Mano Medical is now part of the Genia Group, and provides high quality veterinary equipment.

For more than 20 years, Mano Medical focuses on digital imaging solutions as well as unique products to fit all veterinary clinics needs.

We are happy to introduce part of this range in New Zealand, through your Genia Team :

Warming System:

Manage the body temperature of your patients with our latest carbon technology warming system, specifically designed for veterinary use.

Blood Pressure:

Discover the convenience, ease of use and accuracy of Vet BP Doppler.

Laser Therapy:

Offer Laser Therapy treatments to a variety of patients in your veterinary clinic. This non-invasive and painless treatment option is designed to enhance their well-being.

CARBON TECH

CARBON TECHNOLOGY

- Energy is evenly distributed throughout the mat.
- Ideal temperature reached within a few minutes.

INTEGRATED TEMPERATURE PROBE

- Increased power to heat more efficiently while remaining safe thanks to the automated temperature regulation.
- 3 speed levels: click on the power button to change the speed. Green & blue options are ideal for recoveries and red for surgeries.
- High sensitivity sensor and regulator: contact temperature maintained below 42°C (107.6°F).

HIGHLY RESISTANT MAT

- *Protective coating guaranteed 5 years on bites and scratches.
- Easy cleaning and storage: power block can be disconnected.
- Safety shutdown after 12-hour-use.

CARBON TECH

Samantha, Owner

Did you know that rectal temperatures are not always the most accurate way to assess an anaesthetised patients core body temperature?

The patients rectum can dilate during anaesthesia, and the temperature of the rectal zone is not regulated as a priority by the animals body.

A better option for monitoring is the oesophageal probe, hands up who only just learnt that today like me! 🙄

I've recently been looking into heating options for patients under anaesthesia, and the safety concerns surrounding them and ive come across this carbon tech heating mat from Genia Australia.

It's designed to be quite soft and have no rigid heating elements so reduces the risk of compression sores and ischemia which can be an issue with older patients and those under anaesthetic for prolonged periods of time.

The other great aspect I love is the temperature probes to prevent it from overheating, even if the mat is used incorrectly.

Have you ever seen a burn from one of the old school style mats? 🤢

Renee, Vet Nurse

I have absolutely been loving the new carbon tech heat mats! Both sizes have been working really well in keeping all our patients warm under anaesthetic aswell as keeping them comfortable after procedures :)

The waterproof material and fast warming has been perfect for our daily surgery and hospital patients.

Kathryn, Vet Nurse

The heat mat is working really well so far, we use it for our sterile surgeries and we've found it's keeping our patients warmer for longer. The size fits perfectly to our table and it's easily to clean.

Siobhan, Vet Nurse

We love our Genia's heat mat, it heats up nicely and it's so easy to clean. We use it for all our surgeries.

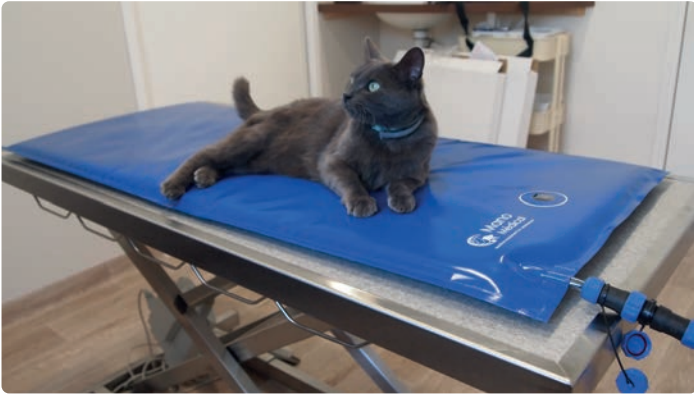

Bree, Head Vet Nurse

We have been using our large carbon tech heating mat for a few months now and love it! It's super easy to clean, heats up quickly and does a great job at maintaining a patient's temperature during surgery. The padding is thick enough to support the patient, but not too bulky, so it's still easy to store.

TESTIMONIALS

EQUIPMENT

Génia	Shoof	Wattage	Size	Description
800000	225031	25W	52 x 62 cm	CARBONTECH MAT
800002	225030	50W	52 x 112 cm	CARBONTECH MAT

Instant and even heating

Automatic power cut out

3 speed levels green, blue & red

Detachable cable for easy cleaning

EQUIPMENT

Increased safety with integrated regulation device

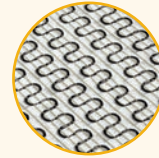

CarbonTech is equipped with a temperature probe and a high accuracy limiter, to ensure that the contact temperature does not exceed the safety limit (42°C).

Extra flat, Carbon Tech V2 carbon fabric does not store heat.

For higher safety, the power is turned off automatically after 12 hours of use

42°C (107.6 F)
maximum

High density carbon fabric

Carbon Tech technology

Carbon Tech incorporates a high density carbon fabric, specially designed for even heat distribution.

The soft and resistant coating offers more comfort to the patient.

Long-life and high efficiency

CarbonTech reaches its regulation temperature within just five minutes.

CarbonTech is designed to maintain the temperature necessary for warming the animal during long periods.

Strong and hygienic

A fastening system allows you to connect the power block safely and securely to the mat. The power block can be stored under the surgery table to ensure a safe working environment.

The protective coating of CarbonTech is designed for maximum resistance to animal scratching and biting and is totally waterproof.

CarbonTech can be easily cleaned with your normal veterinary cleaner. You can disconnect the power cable when cleaning.

Easy cleaning with disconnectable power block

VET DOPPLER

Blood pressure monitoring for your small animal examinations

- Ergonomic design, small and light-weight
- Reliable, accurate, robust and liquid proof
- Rechargeable battery operated
- 4 cuffs in different sizes
- 3 different probes

NON INVASIVE METHOD

Reliable & highly accurate

FULL SET WITH A 8 MHz PROBE

with a large beam for better flow direction

OPTIONAL PROBES

Pencil and transoesophageal

EQUIPMENT

BLOOD PRESSURE PROBE
Large beam for a better flow detection

TRANSESOPHAGEAL DOPPLER PROBE
A cardiac monitoring solution to be used on anaesthetised animals

PENCIL PROBE
For easy exotic animals' examination

DOPPLER SET INCLUDES:

- ✓ 1 8Mhz probe
- ✓ Battery charger
- ✓ Sphygmomanometer
- ✓ 4 cuffs in different sizes (4-8 cm, 6-11 cm, 7-13 cm and 8-15 cm)
- ✓ Headset
- ✓ Tube of gel

All the accessories are packed in a carrying case.

Génia	Shoof	Description
801000	225465	DOPPLER BP - Full kit

VET DOPPLER

Naomi Illguth, Hospital Manager

The doppler is GREAT, works just as we hope. Nice and straightforward to use and clear sounds, we have no issues with it at all :)

Margie, Owner

Genia Doppler has the same setup and application process as the Parks Doppler. The slim shape and size means that it is easy and convenient to use in the clinical setting. I noted that the probe was quite streamlined and the crystal is covered by a sturdy protective sleeve.

Danielle, Head Vet Nurse

The doppler is amazing. Everyone loves it. Picking up a pulse is super quick. The probe is robust, as expected.

TESTIMONIALS

DOPPLER PENCIL

Samantha Clutterbuck, Owner

For reptiles, I've recently discovered these dopplers with pencil probes from Genia Australia that are amazing. The pencil probe can be used in place of a regular small square probe but I find it's especially helpful when looking for chelonian (turtle and tortoise) heart sounds.

The best place to find these heart sounds is generally the left thoracic inlet, but if you've ever tried this yourself, you'll know it can be quite deep, and require pushing your fingers onto the little square probe quite firmly to hear it.

TESTIMONIALS

EQUIPMENT

Reliable and highly accurate device

Measure blood pressure on small animals (including exotics) and detect blood pressure irregularities and changes.

Can be used for monitoring. The probe can be affixed to the animal's paw or tail during an anaesthesia or during intensive care.

Blood pressure measurement in veterinary medicine

At the beginning of the disease, the symptoms of arterial hypertension in animals are difficult to detect. In many cases, the diagnosis is made too late. Primarily older animals and particularly cats are affected by hypertension, however there are also a lot of indications seen in dogs.

A periodic check should be performed on older animals: blood analysis (detection of kidney insufficiency) and blood pressure measurement to detect hypertension. According to current studies, up to 30% of cats suffering from chronic kidney insufficiency have systemic hypertension. Cerebral, ocular, and severe renal problems can be a consequence of arterial hypertension.

It is also useful to perform blood pressure screening before or during an infusion: the arterial pressure can be a suggestive indicator of an animal's condition before an infusion. The veterinarian can adjust the infusion according to the results.

Instructions for use

1. Place cuff around the animal paw (near its carpal pad at the end of the paw) or tail.
2. Put gel on the probe. Place the probe in contact with the blood vessel to examine – no pressure needed (can stop blood flow).
3. Move the probe until you hear a clear heartbeat. Hold the probe with your finger or fix it to the skin with an adhesive plaster.
4. Inflate the cuff with the sphygmomanometer to block the artery until you hear no sound.
5. Deflate the cuff slowly and progressively thanks to the trigger – make sure to unlock the trigger first from its safety set up.
6. When you hear the heartbeat of the animal you can then read the systolic blood pressure on your sphygmomanometer.

Monitoring with the Doppler

The Doppler allows the flow detection in the artery. The probe can be affixed to the animal's paw or tail during an anaesthesia or during intensive care. The veterinary team will hear a sound signal reflecting heart rate and pulse.

vétopop

The best for my pets

The BEST for my PETS !

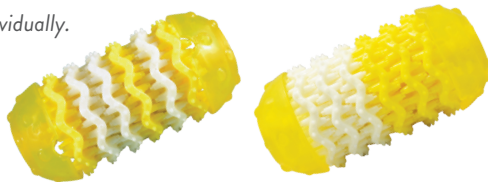

Perfect for pet owners looking to make the most of their time with their furry friends through stimulating and fun products. Our dogs and cats need a good mix of physical play and mental stimulation. Vétopop products are designed to promote movement and learning. They complement your everyday services by supporting weight management (slow feeder bowls), relieving boredom (bouncing balls and sea urchins), encouraging dental health (dental toys) and mental stimulation (puzzles). We also offer a harness and a cooling vest to keep it cool during the warmer months. Great added value for you and your clients!

Available through veterinary clinics only.

Dental Toy

Rotating rubber dental toy for dogs. Durable dog toothbrush improving oral health.

- Textured bumps and ridges help removing dental plaque.
- Can be disassembled to add some treats or take some rings off when cleaning.
- Reduce boredom: the dental toy keeps your animal entertained.
- Made of durable elastomer: light and sturdy.
- Easy to clean & dishwasher safe.
- Sold individually.

👍 Dishwasher safe !

Cosypop

The ideal surgical and recovery bed!

 **MULTI-PURPOSE** – Ideal for SURGERIES: it provides insulation and protects patients from cold surfaces. The COSYPOP® is particularly helpful for airway procedures, dental surgeries and orthopaedics, thanks to its thick non-absorbent headrest. Ideal for in-clinic RECOVERIES: the bed reduces pressure on muscles, joints, and prevents from bedsores. It is non-absorbent: liquids go through, keeping animals dry and clean.

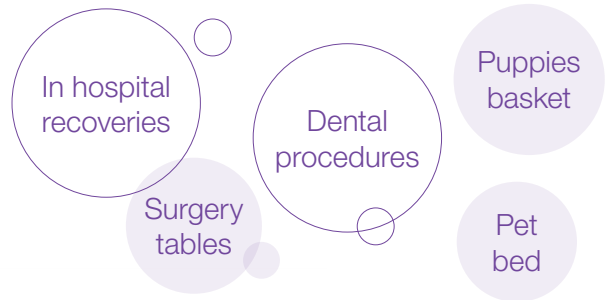

Can also be used as a PET BED at home or as a PUPPY BASKET.

 **MATERIAL** – Unique meshed material that makes the bed breathable and non absorbent. It provides insulation and keeps animals dry at all times. The headrest and the base are made of the same components.

 **NON-SLIP BASE** – Anti-slip base to keep the COSYPOP® stable on surgery table, in the cage or kennel.

 **MACHINE WASHABLE** – The base and the headrest can be washed separately by unzipping them. Up to 40°C on gentle cycle. Quick drying. No tumble dry.

IDEAL FOR YOUR:

40°C - Do not tumble dry
Wash in delicate cycle
if using top loaders

TESTIMONIAL

COSYPOP

Kate, Vet

The Cosypop has been a hit with the team. It's extremely useful for patients with poor bladder control, to help drain away moisture and avoid urine scalding. The soft cushioning in the base is also very comfortable for our non-ambulatory patients, and the raised edges allow us to easily keep their head elevated. It's super simple to clean, and fits perfectly in a standard size cage. We often reach for it if we have patients with tick paralysis, a neurological disorder, or just any animal that needs a particularly comfy spot that feels like a more homely dog bed.

 **Machine washable!**

 **2 IN 1!**
